

Convert to Multiline Text

Command Description

The Convert to Multiline Text command allows the user to convert CAD text to CAD Multiline text within TBC.

1. Click in the **Text objects** field and then in a graphic view select the data you want to convert. Click **Options** for additional selection options.
2. Do either of the following:
 - Click **Apply** to apply the changes and keep the **Convert to Multiline Text** command pane open.
 - Click **OK** to apply the changes and close the **Convert to Multiline Text** command pane.

Note: This command only works on CAD Text data.
